

A)

The screenshot shows the phpMyAdmin interface for the 'studentregistration' database, specifically the 'studentcourses' table. The table contains 6 rows of data. The SQL query shown is 'SELECT * FROM `studentcourses`'. The table structure is as follows:

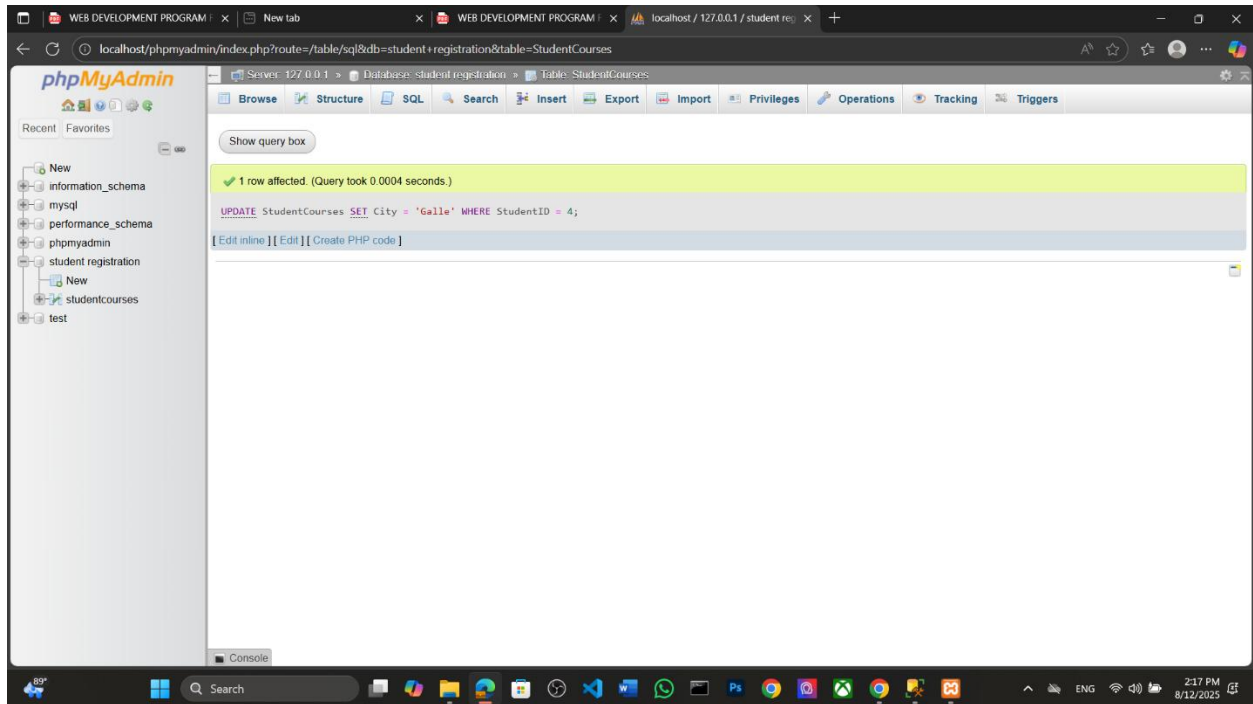

StudentID	Name	City	CourseID	CourseName	LecturerName
1	Kasun Gamage	Kandy	2	Graphic Design	J.S.V. Priyasena
2	Daniel Sam	Jaffna	3	Mobile App Development	K.K.S. Dias
3	Hansi Silva	Colombo	1	Web Development	M.M. Herath
4	Ranidu Heath	Matara	3	Mobile App Development	K.K.S. Dias
5	Praneeth Wijesinghe	Kandy	4	Java	U.H.S. Perera
6	Nuwani Herath	Rathnapura	1	Web Development	M.M. Herath

B)

The screenshot shows the phpMyAdmin interface for the 'studentregistration' database, specifically the 'StudentCourses' table. The table is filtered to show only rows where the 'City' is 'Kandy'. The SQL query shown is 'SELECT StudentID, Name, City FROM StudentCourses WHERE City = 'Kandy';'. The table structure is as follows:

StudentID	Name	City
1	Kasun Gamage	Kandy
5	Praneeth Wijesinghe	Kandy

C)

D)
